

MomentFeed for Insurance

MomentFeed Proximity Search Optimization™ (PSO) for Insurance enables insurance carriers to build a pipeline of high-quality, low cost leads for local agents. You'll connect your local agents with insurance buyers nearby by showing up in search results in a customer's moment of need.

What is PSO and why does it matter for the insurance industry?

The way consumers shop for insurance has changed. Most insurance buyers today turn to a search engine or voice assistant and use unbranded phrases like "car insurance," "life insurance," and "best insurance rates."

How brands show up in organic search results has also changed. Solutions presented to insurance buyers in the organic search results consider the user's location, whether or not they've added "near me." No matter where your business operates today, your customers are local.

Proximity Search Optimization helps captive insurance carriers capitalize on this changing landscape. With PSO your agents will be able to manage all the signals that determine local search rankings:

Location OS

Data Accuracy

Visibility Manager

Location Profile
Completeness

Reputation Manager

Ratings and
Reviews

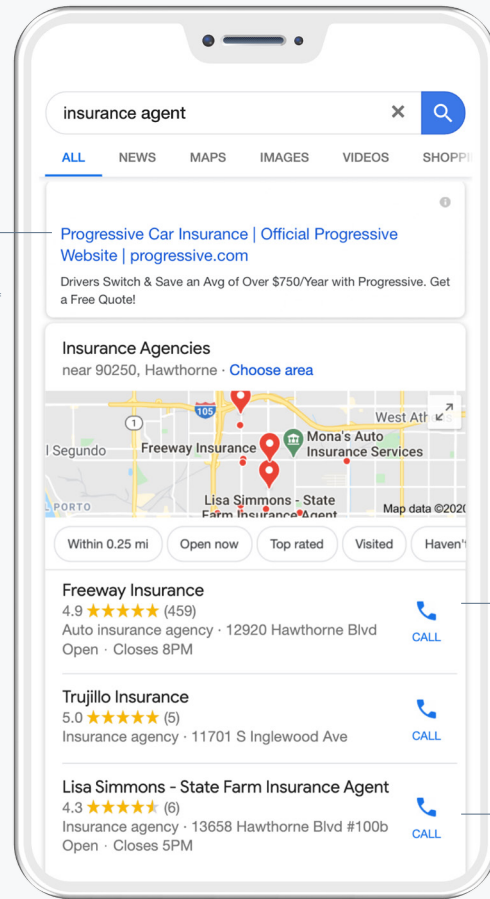

Local Pages

On-Page Signals

Social Amplifier

Local-Social Publishing
and Advertising

Google 3-Pack
Organic search, no cost

**Based on common insurance related keywords

How well brands manage their local presence in these areas directly correlates to how they show up in unbranded search, or more specifically, the **Google 3-Pack**, the first three organic search results. The potential opportunity for insurance carriers appearing in the Google 3-Pack is massive:

~80M

unbranded property and casualty search terms result in a Google 3-pack each year¹

76%

of users visit or call a business within 24 hours of a search²

>61M

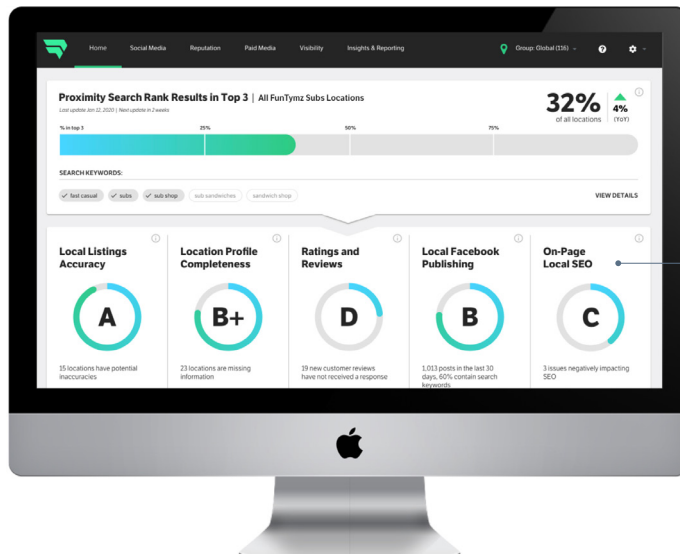

potential leads for carriers with physical agent networks

MomentFeed helps insurance carriers **dominate local unbranded search.**

Why MomentFeed ?

MomentFeed is the only platform that optimizes the five known signals that search engines use to rank local agents when a consumer types "insurance" into their search bar.

MomentFeed is a highly tuned, integrated platform that can raise your discoverability by optimizing the five known signals.

MomentFeed's Proximity Search Optimization Dashboard allows admins to track and report on how each of their agent locations are performing across all five known signals.

MomentFeed Platform

 <p>Location OS</p>	<p>Source of truth for all your location information, including data cleansing and validation for accuracy, storage of information, and portability to other modules within the MomentFeed platform of products.</p>
 <p>Reputation Manager</p>	<p>Review management tool that allows local agents to monitor, respond to, and report on customer reviews and feedback at scale.</p>
 <p>Local Pages</p>	<p>Customizable insurance-centric website layouts and a suite of developer tools (widgets and APIs) to power local pages on your website, consisting of a "get a quote" form, agent picture and profile, location information, social plugs, and more.</p>
 <p>Visibility Manager</p>	<p>Helps multi-location brands manage location data distribution and consistency. It enables location data publishing across the web to more than 250+ networks and directories, which improves search rankings, impressions, and online-to-offline business.</p>
 <p>Social Amplifier</p>	<p>Content publishing, monitoring, and reporting so agents can easily create hyperlocal owned and paid social media campaigns across networks such as Facebook, Instagram, Twitter, Yelp, and Foursquare.</p>

Proximity Discovery Network Relationships

MomentFeed leads the local marketing technology industry in the depth of its partnerships with all of the critical proximity discovery networks. In addition, our open API allows you to connect to critical insurance-specific directories with ease. In total, MomentFeed impacts over 250 networks - here is a list of just some of our strategic proximity discovery network partners:
